RARE PLANTS:

The following are plants that are scarce and rare. These are all unusual and are very interesting.

CORNUS florid. pendula Weeping white dogwood

This species has the same general characteristics as the other dogwoods, having deciduous leaves and small white or greenish flowers in a terminal inflorescence. It is quite easily distinguished by its drooping branches.

Davidia involucrata Dove-tree.

This tree is the rarest plant in America. It required several years of dangerous traveling on foot in the wildest section of China to acquire the original seeds which were sent to America for germination. The Dove-tree is a lovely specimen for the lawn. Grows to a height of 50 to 60 ft. with unusual creamy-white dove-like blossoms, from which it derives its name.

pot plants, \$3.50 each.

HEMEROCALLIS

Day lily

| | | |
|--------------------|--|-------------------------|
| Say state - | Glistening deep yellow, July-August. | 4' .50 each. |

JAPANESE TREE PEONIES.

Mixed colors:

Flowers very large and resemble crepe paper. Branches do not die back, they remain unharmed throughout winter freezing and grow to be small trees 4-6'.

3-yr. field plants, each \$1.00

4-yr. field plants, each \$1.50

LIRIOPE 9 inches

graminifolia lovely grass-like foliage, flowers pinkish blue in August. loves shade under rhododendrons and azaleas, where it is cool and moist. Splendid ground cover. 5 in. pot plants, \$20.00 per 100.

OPHIOGOGON

Japanese snake-root.

Japanicum. shade loving plant. Grows in clumps 8-10 inches tall. flowers are lilac blue. foliage evergreen all winter, a real gem, blooms in August - in September.

5 in. pot plants \$25.00 per 100.

Jaburan auriculus variegatus. is somewhat similar to the preceding variety, foliage is striped yellow and green. Flowers purplish blue. 3 in. pot plants \$15.00 per 100.

PICEA excelsa niphophila

nest-shaped spruce.

PICEA continued.

This is of such extraordinary dense form and so closely branched that one wonders how the light ever gets to the lower branches. Branchlets in tight layers, the whole forming a dense, impenetrable head. It grows slowly, $\frac{1}{4}$ - $\frac{1}{2}$ " yearly. It is one of the true dwarf Evergreens. It's ultimate size is a matter dependent upon conditions. Because of it's size it is valuable for specimens, groups or hedges.

15 inches \$2.75 each. 20 inches \$4.00 each.
18 inches 3.50 each

TAXUS ovata

Yew.

A rare yew of upright habit of growth: a cross between *Taxus cuspidata* and *hibernica*. Very dark green, stands terrific cold winters without browning, makes perfect specimen or is about the finest for yew hedges.
